

Multiplying

Multiply with each number in the brackets. Sharing is caring.

Area: $L = 2x^2 + x + 5, W + 2 = x$

$L = 2x^2 + x + 5, W + 2 = x, H = 2x$

6.b) p.53

Volume of prism = $6x^2 \text{ mm}^3$

Multiplying Algebraic Expressions

$$-2(x^2 + 3x - 5)$$

$$-2(x^2 + 3x - 5) - 3(x - 4)$$

Dividing

Divide each number in the brackets/in the top part of the fraction. Sharing is caring.

$$\frac{-3x^2 + 6x - 3}{3}$$

$$- \frac{3x^2 + 6x - 3}{3}$$

$$\frac{-3x^3 + 6x^2 - 3x}{3x}$$
